

TZR 400 TURBOJET ENGINE

*a compact fully
redundant turbojet
engine with multiple
use cases*

ZAPATA

The TZR jet engine powers all our flying platforms. It was **designed in-house** to meet the **demanding requirements of manned VTOL flight**. We performed extensive R&D work **in partnership with ONERA** focusing mainly on three aspects: **redundancy, efficiency and TBO**.

SPECIFICATIONS

L x D (mm)	318 x 146
Weight	3,1 kg
Fuel	Jet A1 + 4% oil

PERFORMANCES

Thrust	430N
SFC	0.155 kg/N/h
TBO	100 hours

FEATURES:

- ☑ Dual fuel pumps
- ☑ Dual electronics
- ☑ Dual double power supply
- ☑ Triple RPM sensors
- ☑ Bearing cooling through fuel circulation, improving TBO and efficiency
- ☑ Air circulation through the shaft to allow additional lower bearing cooling
